

Testimonial on Social Security

Dear Staff (especially age 60 and over),
There are so many different options (over 700 I believe) for Social Security. I have done some research and have asked other's opinions, including the Social Security department. Looking back, I would suggest calling Fidelity and get their expert advice and calculations as this is easy and accurate.

Recently, as I was reading an article in Kiplinger Magazine, I discovered that I could sign up at the Social Security department for a program that I did not know existed. The program is going to be worth approximately \$17,000 for us in the next four years! Who would have known!

My wife started Social Security at age 62 and I plan to start at age 70. However, at age 66 I am able to receive 1/2 of her amount each month until I reach the age of 70. Last month, I started receiving my checks from Social Security.

Feel free to contact me if you have questions.

In His Grip,
Dave Bowman
